Seat Height
(1-piece or 2-piece models)
Lift the handle on the right to adjust seat height.

Forward Tilt
(optional on two-piece models)
Slide the grooved mechanism located under the right side of the chair forward to activate the forward tilt. Recline slightly to engage the mechanism. To return to normal, slide the lever back to the rear and recline slightly.

Tension Adjustment
(optional on 1-piece models and standard on 2-piece models)
Lean back and recline. Adjust tension if necessary. Reach under the front of the seat to find the knob. Turn left to tighten and right to loosen.

Standard Adjustable Arms:
(optional)
Amped Height
Press the green button on the inside of the arm support for 3 1/2” of height adjustment.

Amped Height
Lossen the three bolts under the arm support with a screwdriver, slide the arm support right or left of center and retighten the bolts for 2” of width adjustment.

Tilt Lock
(1-piece or 2-piece models)
On the left side of the chair, pull the lever forward to lock chair upright and push back on the lever to release.

Amped Width
Twist the knob located beneath the arm support to adjust the arm supports. Each of the arm supports can be adjusted 2 1/2” in width (1” each side).

Back Angle Adjustment
(2-piece models optional)
On the right side of the back rest, press the lever outward from the chair to adjust the back angle. There are 6 positions where the back angle can be stopped for total of 15” of adjustability.

Amped Rotation
Grasp the ampad at the center and rotate 24” inward.

Back Height Adjustment
(2-piece models only)
Place both hands on the back and lift to raise the back height. The back height adjust 5 notches upward for a total of 3” of adjustability. The 6th notch brings the back down to the lowest position.
