

**Request for Interlock Override Approval
for X-ray Diffraction Units**

PA Department of Environmental Protections regulations prohibit overriding interlocks on x-ray diffraction units unless written approval has been granted by the facility's Radiation Safety Officer (RSO). In order for the RSO to initiate a review, the following information must be provided:

Unit location	
Unit Manufacturer & model	
Contact name	
Contact phone number	

Reason for the requested override approval (e.g., beam focusing):

Controls and procedures to assure the radiation safety of individuals working around the unit:

Individuals who will be performing the interlock override:
