</table>

*Image descriptions include:* 
- Not Contaminated Glassware: Non-contaminated laboratory glassware and sharps should be disposed of in designated containers.
- Sharps: Intravenous needles, syringes, and other sharp objects should be disposed of in puncture-resistant containers.
- Biological Hazard / Infectious / rDNA: Biohazardous materials should be disposed of in containers labeled with biohazard symbols.
- Chemical: Chemical disposal should follow the specific guidelines for the hazardous substances involved.
- Radioactive: Radioactive materials should be disposed of in containers labeled appropriately for radiation safety.
