GET THE FACTS!
Do you work in a biomedical laboratory that has one or more of these common chemical and physical lab hazards?
If so, check out these Fact Sheets in Penn’s Chemical Hygiene Plan.

Chemical Hygiene Plan
Penn’s Chemical Hygiene Plan (CHP) is where you’ll find procedures for safe handling of chemicals and some physical hazards in the laboratory.

The Standard Operating Procedures (SOPs) included in section XVI of the CHP cover broad hazard categories like Flammable Liquids and Corrosives.

You can find more detailed information about specific hazardous chemicals or physical hazards in the lab by reading the Fact Sheets, which are also found in section XVI.

Links to Fact Sheets for common chemical and physical hazards in biomedical labs are listed on the right side of this page.

Need more information about a physical or chemical hazard or don’t see a Fact Sheet that addresses your questions?
